## Trade Only Survey

**Have you ever tried to support a Trade Only plumbing supplies?  
If the answer is "never", we want to hear from you.**

At Plumbers Choice we understand we are not the biggest player in the plumbing supplies game. Often, we are not as convenient as other suppliers and we are not always the cheapest.

What separates us from every other plumbing supplies in the country is that we will never sell to your customers. You will never lose a job to a DIYer who has bought their plumbing gear from us. If you call us for the first time and make us one of your suppliers, you will also have that warm feeling inside that you have supported your trade. You will have moved the industry one step closer to being a Trade Only industry.

Jump online at [www.plumberschoice.com.au](http://www.plumberschoice.com.au) or give us a call on 03 9720 8274

**TIP OF THE MONTH**

**WELL DONE  
STUART LITTLE**

## 20¢ Piece

Tip of month - When you are concerned about a customer not paying. Drill a hole in a 20 cent piece and install it in the barrel union of the meter, they get enough to flush the toilet (just) but not enough to have a shower. Cheapest insurance you'll ever get!

Courtesy - Stuart Little

# THERMOCOUPLE TESTING AND TOOL KIT

plumtool

Testing and replacement made easy

1  
Unscrew the existing thermocouple from the control unit of the appliance.

2  
Fit the end of the thermocouple into the tester. (If you need to use the universal bush provided, you may need to gently flatten a section of the thermocouple tube to slip the bush on)

3  
Light the pilot using the normal method for the appliance.

4  
Whilst continuing to hold down the button on the appliance for 20 seconds, depress the spring on the testing device at the same time.

5  
Release pressure on the thermocouple testing device spring only.

If the spring on the testing device remains closed then the thermocouple is working and power is being supplied to the electro-magnet in the testing device. If the spring releases while the pilot light is on, then the thermocouple is faulty and should be replaced.

- This kit includes spanners to suit any thermocouple and also includes a testing device to determine if the existing thermocouple is still working.
